EXECUTIVE SUMMARY

The 2010 – 2019 Distribution Development Plan (DDP) update is the 7th publication since the passage of the Electric Power Industry Reform Act of 2001 (EPIRA). In the planning period 2010-2019, the Distribution Utilities (DUs) expect an increase in peak demand of 4,258 MW from 8,856 MW in 2009 to 13,113 MW in 2019, representing an average growth of 4.0% annually. Luzon is projected to have a 3.9% annual average growth rate in peak demand, from 7,057 MW in 2010 to 9,553 MW in 2019. Visayas and Mindanao will have a higher growth rate at 4.5% and 4.4% respectively from 1,204 MW in 2010 to 1,737 MW in 2019 for Visayas, and from 1,250 MW in 2010 to 1,823 MW in 2019 for Mindanao.

In terms of aggregated energy requirements of DUs in Luzon, it is projected to grow at an annual average growth rate of 4.0%, equivalent to 16,023 GWh, over the ten-year planning period, from 40,504 GWh in 2010 to 56,527 GWh in 2019. Visayas DUs is seen to register an annual average growth rate of 4.7% or 3,132 GWh, from 6,354 GWh in 2010 to 9,486 GWh in 2019, Mindanao DUs will register a 4.4% annual average growth rate or 3,114 GWh, from 7,019 GWh in 2010 to 10,133 GWh in 2019.

Likewise, the DUs are projecting a substantial increase in the number of customers by 2019: Luzon at 12.122 million; Visayas at 3.593 million; and Mindanao at 3.267 million. These translate to an annual average growth rate of 3.01% in Luzon, 4.09% in Visayas, and 4.02% in Mindanao energy sales, respectively. Increase of number of DU's customer is particular to the increase by 5,001,088 residential customers of the expected 5,362,752 DU customers over the planning period. Overall, from total of 13,619,247 customers in 2009, DUs are projecting a total of 18,979,999 customers by 2019.

To meet the projected increase in energy requirements over the planning horizon, an estimated 26,565 ckt-km of lines are programmed for rehabilitation and/or upgrading, 17,630 ckt-km of lines are for construction, and an additional 5,232 MVA substation capacity will be constructed. These will have corresponding investment requirements amounting to PhP 68.1 billion, broken down into: PhP 18.4 billion for electrification projects, PhP 17.2 billion for construction new lines, PhP 11.1 billion for additional substation capacity, and PhP 21.3 billion for rehabilitation of distribution lines.

2010 Distribution Development Plan

1.1 Introduction

The Department of Energy (DOE) publishes annually the Distribution Development Plan (DDP) of all distribution utilities (DUs) in the country. The DOE consolidates into the national DDP the individual DDPs of DUs: the Private Investor-Owned Utilities (PIOUs), Local Government Unit-Owned Utilities (LGUOUS), Multi-purpose Cooperatives, and the Electric Cooperatives (ECs) as endorsed by the National Electrification Administration (NEA).

The annual submission and preparation of DDP is in compliance with Republic Act No. 9136 and is prescribed by the DOE Department Circular No. 2004-02-002.

The DDP covers the DUs¹ 10-year program on acquisition of sub-transmission assets, expansion and rehabilitation of distribution facilities and the costs associated to these activities in order to deliver the electric power services to the projected number of customers, and their corresponding energy and demand requirements.

The 2010 DDP contains the individual DDPs of 122 DUs (Table 1). This is the 7th annual update of DUs consolidated DDP.

1.2 Highlights of the 2010 DDP

Number of Customers and Sales

Note: 2009 Figures are actual.

Figure 1. DUs Number of Customers, 2009-2019

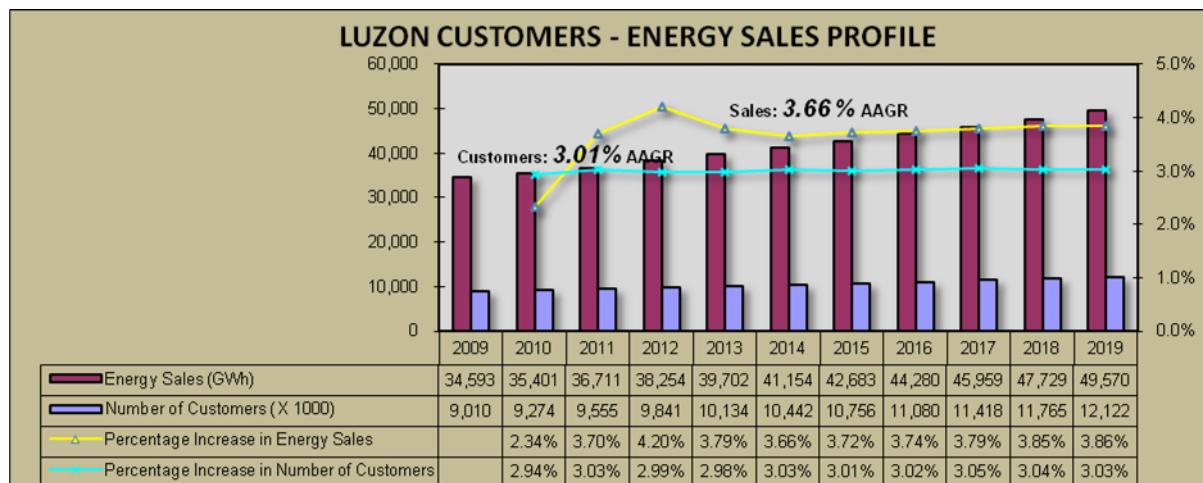

¹ A total of 24 DUs did not submit its 2010 DDPs. These DUs are: Luzon DUs; PUD, Corcuera Electric System, Cabanatuan Electric Corp., Banton Electric System, Conception Electric System, ABRECO, PANELCO III, ISELCO II, NUVELCO, QUIRELCO, SAJELCO, PRESKO, PELCO III, PENELCO and SORECO II; Visayas DUs; Hilabaan MPC, Maripipi MPC, ILECO I, CENEKO, NOCECO and NORECO II; Mindanao DUs; Bumbaran Electric Light System, CASELCO and LASURECO.

In 2009, DUs provided electricity services to at least 13.617 million customers. Over the 2010-2019 planning period, DUs are expecting a 3.5% increase in the number of customers in 2010, 3.3% in 2014 and 3.4% in 2019² (Figure 1). The DUs in Luzon are projecting that their customers will reach 12.122 million in 2019 whereas DUs in the Visayas and Mindanao will have to expand their services to 3.598 million and 3.265 million customers, respectively by 2019 (Table 2).

Luzon

Over the planning period, Luzon PIOUs and LGUOUs are projecting an increase of 1.9% in their number of customers whereas Luzon ECs project a 4.3% increase in its customers.

The projected growth rate of 3.0% in the total number of customers in the Luzon grid, from 9,274 million customers in 2010 to 12,122 million customers in 2019 will have a corresponding increase in energy sales of 3.66%, with estimated energy sales of 35,401 GWh in 2010 to 49,570 GWh in 2019 (Figure 2).

Note: 2009 Figures are actual.

Figure 2. Luzon Energy Sales - Number of Customers

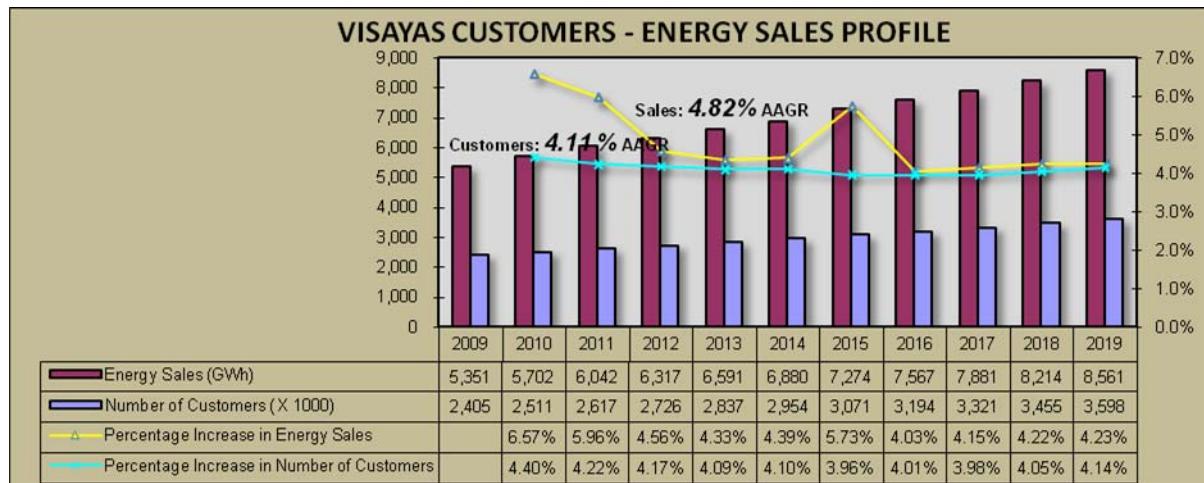

In 2009, residential customers of Luzon DUs account to approximately 52% and 39% respectively of Luzon's total number of customers. Over the planning period, residential customers of Luzon PIOUs/LGUOUs customers will increase by an average of 1.9%, while for the ECs an average of 4.5% are residential customers. Projected increase in sales for 2010 to 2012, is due to the expected entry of large load customers in, among others, BENECO, INEC, and PANELCO I, and also due to the expected increase in consumption of existing large load customer of SEZ, TEI, and SFELAPCO.

Visayas

In the Visayas, PIOUs are expecting an increase of 2.3% in their number of customers while the ECs project an increase of 4.5% in its customers.

² Figures from DUs with 2010 DDP submission only.

In 2009, of the total number of DU customers in Visayas region, 4.7% are residential customers of ECs and 2.0% are PIOU customers. Over the planning period, 4.5% of ECs customers will be residential while 2.3% for PIOUs customers. Approximately 90% in the Visayas region will be residential customers.

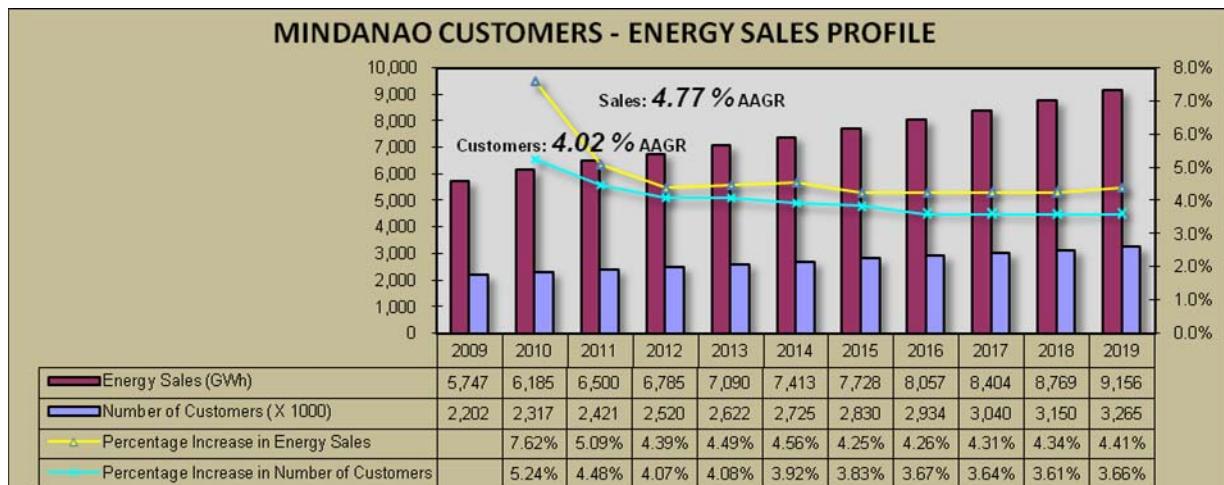

Note: 2009 Figures are actual.

Figure 3. Visayas Energy Sales - Number of Customers

2010 to 8,561 GWh in 2019. This is in comparison with the 4.11% expected growth rate in the number of customers over the planning period from 2.405 million customers in 2010 to 3.598 million customers in 2019 (Figure 3). The sudden increase in sales projection in 2015 is attributed to the entry of CEMEX, a cement manufacturing company, in the VECO franchise.

Mindanao

In Mindanao, PIOUs are projecting an increase of 3.2% in their number of customers while the ECs project an increase of 5.8% in its customers. In total, it is estimated that there will be 3.265 million customers in 2019 from 2.317 million customers in 2010. This is equivalent to a growth rate of 4.02%.

Note: 2009 Figures are actual.

Figure 4. Mindanao Energy Sales - Number of Customers

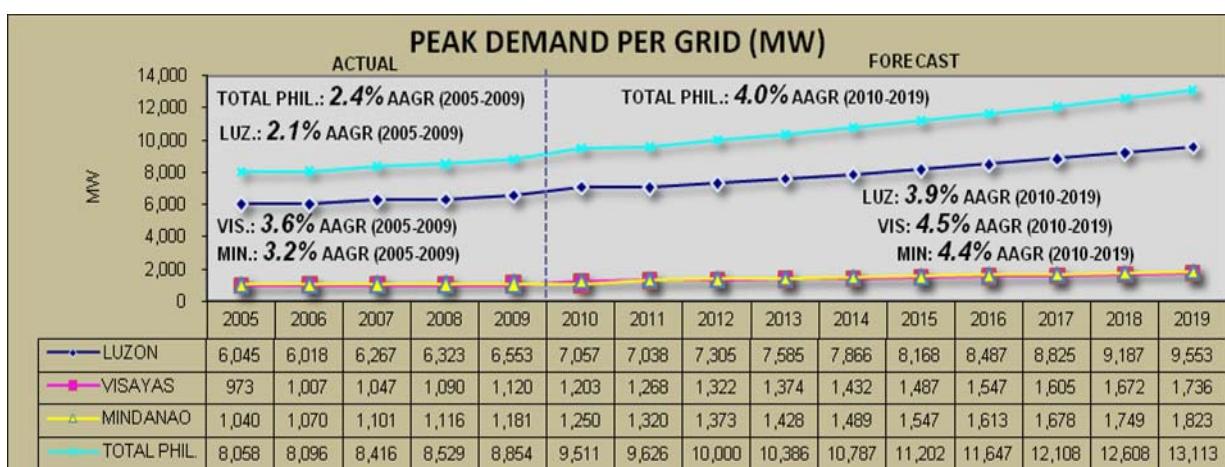

With this increase in the number of customer, Mindanao DUs expect an equivalent growth rate in energy sales over the planning by an average growth rate of 4.77%, from 6,185 GWH in 2010 to 9,156 GWH in 2019 (Figure 4).

Approximately 88% of Mindanao DUs were residential customer in the year 2009. This percentage will relatively not change over the planning period. Of the total customers of Mindanao DUs, 18% are residential customers of PIOUs while 70% are residential customers of ECs.

Demand Requirement

In the planning period, 2010-2019, the DUs total peak demand³, which stood at 8,854 MW in 2009, is expected to grow annually at an average rate of 4.0% (Figure 5). Luzon's peak demand is estimated to increase annually at an average of 3.9%, with demand reaching 7,057 MW in 2010 and 9,553 MW in 2019 (Figure 6). In Visayas, DUs demand is estimated to peak at 1,203 MW in 2010 and 1,737 MW in 2019, equivalent to an annual average growth rate of 4.4% over the planning period. In Mindanao, DUs are projecting an annual average rate of 4.4% increase in peak demand, from 1,250 MW in 2010 to 1,823 MW in 2019.

Actual peak demand for the country from 2005 to 2009 increased at the average rate of 2.4% or 796 MW, from 8,058 MW in 2005 to 8,854 MW in 2009. Visayas led the grid with an increase of 3.6% or 147 MW, followed by Mindanao with 3.2% or 141 MW and then Luzon with 2.1% or 508 MW.

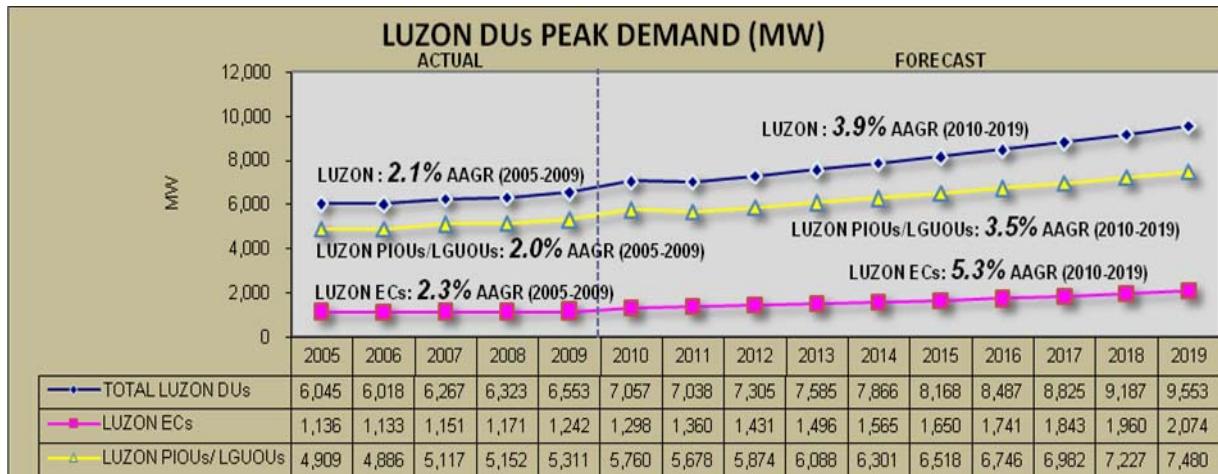

Note: Figures include data from 2009 and 2008 DDP. Please see Table 3, 4 and 5.

Luzon

Luzon PIOUs and LGUOUs peak demand will increase annually at an average of 3.5%, with demand reaching 5,760 MW in 2010 and 7,480 MW in 2019 (Table 3). Meralco will have an average increase in demand of 3.5% with demand of 5,340 MW in 2010 and 6,937 MW in

³ Peak Demand indicated is non-coincidental peak.

2019 while the rest of the PIOUs and LGUOUS will have an accumulated demand of 401 MW in 2010 and 528 MW in 2019 equivalent to an average increase in growth of 3.1%. ECs estimate an annual average increase of 4.3% at 1,298 MW in 2010 to 2,074 MW in 2019 (Figure 6).

Note: Figures include data from 2009 and 2008 DDP. Please see Table 3.

Figure 6. Luzon DUs Peak Demand (MW), 2005-2019

Luzon ECs have increased their demand at a rate of 2.3% or 106 MW while Luzon PIOUs/LGUOUS have 2.0% or 402 MW increase in their demand from 2005 to 2009. Meralco's peak demand of 4,910 MW in CY2009 accounted for 71% of Luzon's Peak Demand of 6,928 MW⁴ for that year.

Visayas

Visayas PIOUs peak demand will increase at an average of 4.3% annually, with demand reaching 530 MW in 2010, 625 MW in 2014 and further to 717 MW in 2019 while Visayas ECs are expected to increase by an annual average rate of 4.5% (Figure 7). Actual demand from 2005 to 2009 in Visayas showed that ECs increased their demand with 89 MW or 3.8% while PIOUs/LGUOUS added 59 MW or 3.3% to their demand.

On a per island basis, DUs in Leyte-Samar expect an increase of 4.7% in peak demand from 119 MW in 2010 to 181 MW in 2019, Cebu DUs, including Mactan's, sees demand to increase from 498 MW in 2010 to 652 MW in 2019, equivalent to an annual average growth rate of 3.9% (Table 4). Bohol DUs expect an increase of 5.7% average growth rate. DUs in Negros projected an accumulative 4.4% average growth rate in demand with demand expected to be 237 MW in 2010 increasing to 349 MW in 2019. The eight DUs in Panay, expected demand to be 229 MW in 2010 and increase to 359 MW in 2019 representing an equivalent increase of 5.0%.

⁴ Data from the National Grid Corporation of the Philippines

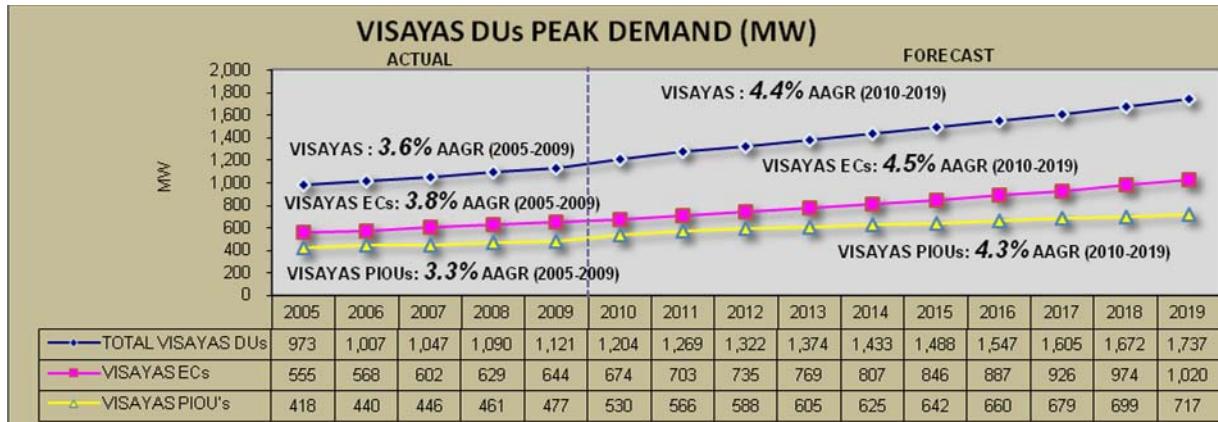

Figure 7. Visayas DUs Peak Demand (MW), 2005-2019

VECO's peak demand of 336 MW in CY2009 accounted for 27% of Visayas Peak Demand of 1,241 MW⁵ for that year.

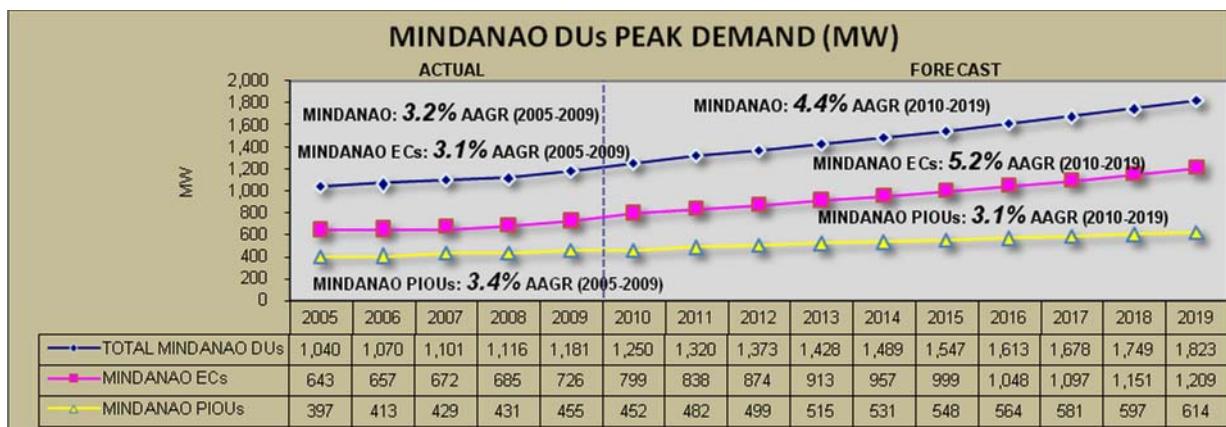

Figure 8. Mindanao DUs Peak Demand (MW), 2005-2019

Mindanao

Mindanao PIOUs have projected to have an annual increase of an average rate of 3.1% in peak demand, with demand reaching 452 MW in 2010 and 614 MW in 2019 (Table 5). Davao Light and Power Corporation (DLPC) sees its demand to increase from 268 MW in 2010 to 374 MW in 2019, equivalent to an average increase of 3.43% while the rest of the PIOUs will have an accumulated demand of 184 MW in 2010 and 241 MW in 2019 equivalent to an average increase in growth of 2.54%. ECs expected a higher increase in peak demand at an average rate of 5.2% annually, bringing peak demand from 799 MW in 2010 to 1,209 MW in 2019 (Figure 8).

Mindanao ECs increased by 3.1% or 84 MW in their demand while Mindanao PIOUs had 3.4% increase or 57 MW in their demand from 2005 to 2009. DLPC's peak demand of 267 MW in CY2009 accounted for 21% of Mindanao's Peak Demand of 1,303 MW⁶ for the year.

⁵ Data from the National Grid Corporation of the Philippines

⁶ Data from the National Grid Corporation of the Philippines

Overall, DUs anticipate an increase of 4,359 MW in peak demand over the planning horizon, 3,000 MW in Luzon, 616 MW in Visayas, and 642 MW in Mindanao.

Energy Requirement

DUs will require 53,877 GWh in 2010, 62,314 GWh in 2014 and 76,146 GWh in 2019⁷ (Figure 9). An annual average growth rate of 4.0% in the energy requirements in Luzon is projected over the ten-year planning period from 40,504 GWh in 2010 to 56,527 GWh in 2019. Visayas is seen to register an annual average growth rate of 4.7%, from 6,354 GWh in 2010 to 9,486 GWh in 2019, whereas Mindanao will register a 4.4% annual average growth rate, from 7,019 GWh in 2010 to 10,133 GWh in 2019. From 2005 to 2009, Luzon grid demanded 2.2% increase or 3,185 GWh of energy; Visayas grid required 4.8% increase or 1,025 GWh and Mindanao grid had 3.8% or 914 GWh in their generation.

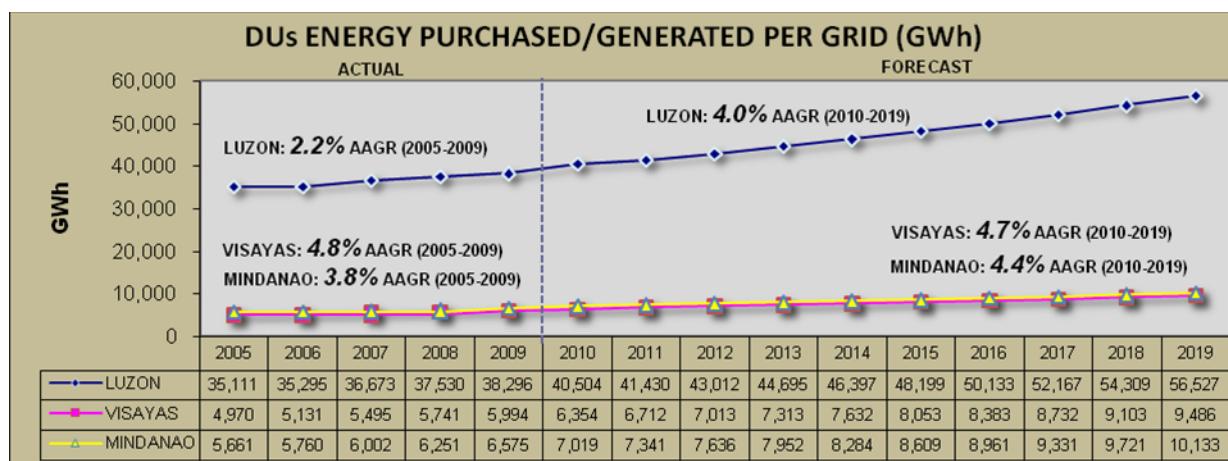

Figure 9. DUs Energy Purchased/Generated per Grid (GWh), 2005-2019

GWh in 2010 to 4,281 GWh in 2019, while that of Visayas ECs will rise by 5.0% from 3,368 GWh in 2010 to 5,204 GWh in 2019.

The Cebu sub-grid energy requirement will be at 2,653 GWh in 2010 and 3,625 GWh by 2019, representing a 4.0% annual average growth rate. Negros and Panay sub-grids will have an average growth rate of 4.6% and 5.4%, respectively, with energy requirement of 1,198 GWh in 2010 and 1,805 GWh in 2019 for Negros and 1,143 GWh in 2010 and 1,816 GWh in 2019 for Panay.

Mindanao PIOUs energy requirement will increase at an average of 3.3% annually, 2,754 GWh in 2010 and 3,648 GWh in 2019, while their EC counterparts see a growth of 5.1%, 4,265 in 2010 and 6,485 GWh in 2019. Overall, DUs sees an increase of 25,280 GWh in energy requirement over the planning horizon, 18,231 GWh in Luzon, 3,491 GWh in Visayas, and 3,558 GWh in Mindanao.

⁷ In the case of DUs without 2010 DDP submission (footnote 1), data from their respective 2009 and 2008 DDP are used.

Infrastructure and Capital Requirements

In order to provide quality, secure and reliable power, about 26,565 ckt-km of lines are programmed for rehabilitation and/or upgrading and 17,630 ckt-km of lines are for construction while an additional 5,232 MVA substation capacity will be constructed⁸ (Figure 10 and 11).

On a per grid basis, Luzon DUs will require 3,710 MVA additional substation capacity, 7,171 ckt-km of new distribution lines and rehabilitation of 21,466 ckt-km of lines (Table 6). In the Visayas, DUs plan to rehabilitate 2,443 ckt-km of lines, extend coverage of distribution lines by 5,170 ckt-km, and construct new substation capacity of 848 MVA. In Mindanao, developments in infrastructure requirements are focused on construction of 675 MVA substation capacity and 5,289 ckt-km of distribution lines, and rehabilitation of 2,656 ckt-km of lines.

Implementing all these projects will require PhP 68.1 billion investments (Figure 12). The largest bulk of the financial investments, estimated at about PhP 21.3 billion are for the rehabilitation while PhP 18.4 billion will be utilized in the electrification projects. PhP 28.3 billion will be utilized for new distribution lines and additional substation capacity (Table 7).

In Luzon, costs for rehabilitation of distribution lines will amount to PhP 9.4 billion whereas construction of additional substation capacity and implementation of electrification projects will require PhP 3.4 billion and PhP 8.7 billion, respectively. Expansion projects will entail PhP 7.2 billion in cost. Looking at similar infrastructure requirements in Visayas, expansion of new distribution lines will reach PhP 2.7 billion.

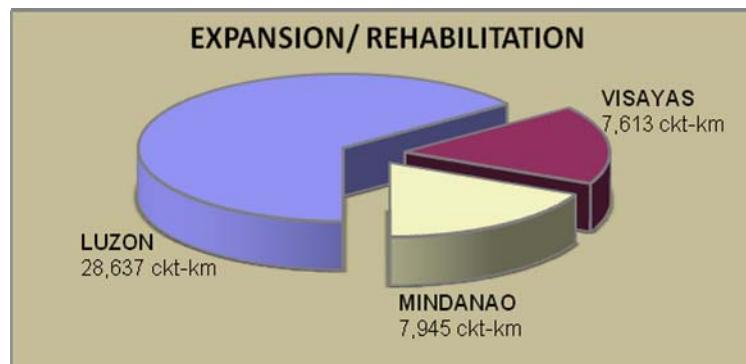

Figure 10. Total Expansion/ Rehabilitation (ckt-km), 2010-2019

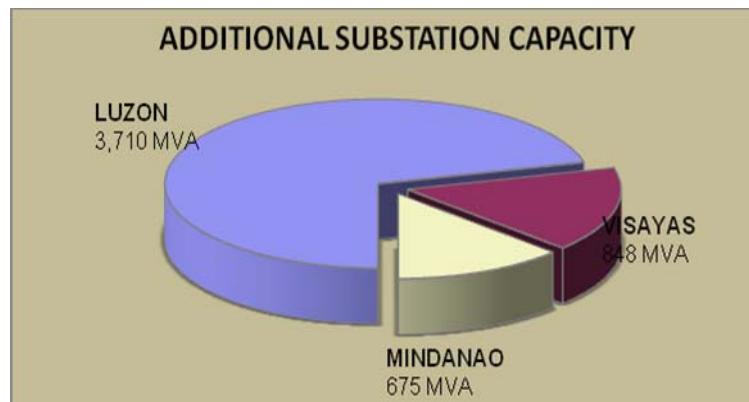

Figure 11. Total Substation Capacity Addition (MVA), 2010-2019

⁸ Figures from DUs with 2010 DDP submission only.

Moreover, total cost for new substation capacities is estimated at PhP 5.2 billion, electrification projects at PhP 3.9 billion and rehabilitation projects at PhP 4.4 billion. Similarly, to improve system performance in Mindanao, DUs are projecting an investment of PhP 7.4 billion in expansion of new distribution lines, PhP 2.5 billion in additional substation capacities, PhP 5.8 billion in electrification projects, and PhP 7.5 billion in rehabilitation and upgrading of existing distribution lines.

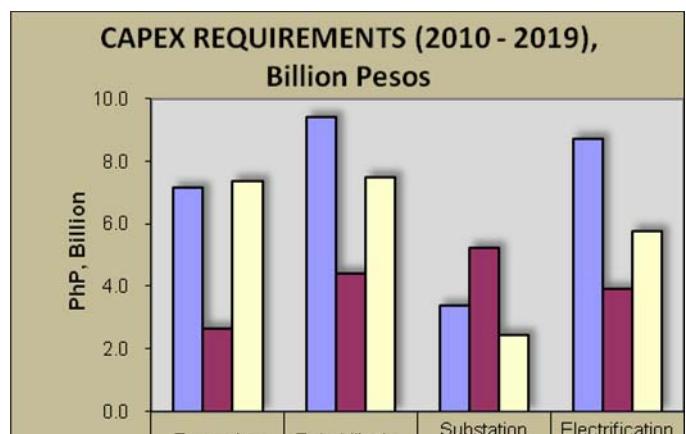

Figure 12. Capital Expenditure Requirements (PhP B), 2010-2019

SUPPLY HIGHLIGHTS

In order to meet load growth demand, old substations will be upgraded and new ones will be commissioned. Ninety (90%) of power supply will come from NPC thru a bilateral contract and the remaining 10% will come from the WESM.

SUPPLY HIGHLIGHTS	
<p>The direct participation of INEC to the WESM give INEC the flexibility to choose its power supplier at a 24/7 basis, by the hour and by the day. Northwind power has sold to INEC about 105,860,338 kwh from Jan.2006 to Dec. 2007, while WESM has sold to INEC 44,484,225 kwh from Jan.-Dec. 2007 and NPC 91,768,743 kwh. By year 2010, renewables such as PNOOC, UPC-Asia & ELG with a projected capacity of about 100MW on available basis will be on stream to the TRANSCO Grid and INEC is encouraged to buy and sell their generated output.</p>

SUPPLY HIGHLIGHTS																																																																																															
<p>Will be participating in the WESM by 2010 and expects power requirements to be supplied through other IPPs or with NPC. In 2012, a bilateral contract with BGNPI will be enforced. A 2 - 5 MVA substation at Sta. Cruz and Cabugao will be constructed by 2010.</p>

SUPPLY HIGHLIGHTS		Supply - Demand Profile (MW)																																																																																													
LUELCO expects to have a steady increase in annual demand of about 3.9 % and a 5-year average energy purchase of 4.9 % from year 2009 to 2014 due to increased in potential customers, particularly residential and commercial/industrial customers. The bulk of its power and energy requirements for the next ten (10) years will be sourced out from AES - Masinloc (2010-2011), GN Power beginning 2012 and the remaining 10% of its total energy requirements will be trade from WESM.		<table border="1"> <thead> <tr> <th>Year</th> <th>Add'l Cap to meet at least 13.2% RM (MW)</th> <th>Indicative Supply (MW)</th> <th>Firm Supply (MW)</th> <th>PEAK LOAD (MW)</th> </tr> </thead> <tbody> <tr><td>2005</td><td>3</td><td>0</td><td>26</td><td>26</td></tr> <tr><td>2006</td><td>3</td><td>0</td><td>26</td><td>27</td></tr> <tr><td>2007</td><td>3</td><td>0</td><td>27</td><td>27</td></tr> <tr><td>2008</td><td>4</td><td>0</td><td>27</td><td>27</td></tr> <tr><td>2009</td><td>4</td><td>0</td><td>28</td><td>30</td></tr> <tr><td>2010</td><td>4</td><td>1</td><td>28</td><td>30</td></tr> <tr><td>2011</td><td>4</td><td>2</td><td>29</td><td>30</td></tr> <tr><td>2012</td><td>4</td><td>2</td><td>29</td><td>31</td></tr> <tr><td>2013</td><td>4</td><td>3</td><td>29</td><td>32</td></tr> <tr><td>2014</td><td>4</td><td>4</td><td>30</td><td>33</td></tr> <tr><td>2015</td><td>5</td><td>5</td><td>29</td><td>34</td></tr> <tr><td>2016</td><td>5</td><td>7</td><td>29</td><td>35</td></tr> <tr><td>2017</td><td>5</td><td>8</td><td>29</td><td>37</td></tr> <tr><td>2018</td><td>5</td><td>10</td><td>28</td><td>38</td></tr> <tr><td>2019</td><td>5</td><td>12</td><td>28</td><td>40</td></tr> </tbody> </table>														Year	Add'l Cap to meet at least 13.2% RM (MW)	Indicative Supply (MW)	Firm Supply (MW)	PEAK LOAD (MW)	2005	3	0	26	26	2006	3	0	26	27	2007	3	0	27	27	2008	4	0	27	27	2009	4	0	28	30	2010	4	1	28	30	2011	4	2	29	30	2012	4	2	29	31	2013	4	3	29	32	2014	4	4	30	33	2015	5	5	29	34	2016	5	7	29	35	2017	5	8	29	37	2018	5	10	28	38	2019	5	12	28	40

SUPPLY HIGHLIGHTS																																																																																															
<p>Energy supply requirements come from NPC, private IPP and mini hydro. ISELCO I intends to install a 10 MVA Substation and one km of 69 kv line in Cauayan City to augment the power requirement of the city. Upgrading of over loaded 10 MVA substation at Alicia to 20 MVA to improve the service reliability on that area. A 10 MVA S/S and 16 kms 69 kv line at Jones will be constructed to improve the reliability of service in Jones and San Agustin.</p>		<table border="1"> <caption>Data for Supply - Demand Profile (MW) (Approximate Values)</caption> <thead> <tr> <th>Year</th> <th>Add'l Cap to meet at least 13.2% RM (MW)</th> <th>Indicative Supply (MW)</th> <th>Firm Supply (MW)</th> <th>PEAK LOAD (MW)</th> </tr> </thead> <tbody> <tr><td>2005</td><td>5</td><td>0</td><td>40</td><td>40</td></tr> <tr><td>2006</td><td>5</td><td>0</td><td>40</td><td>40</td></tr> <tr><td>2007</td><td>5</td><td>0</td><td>39</td><td>40</td></tr> <tr><td>2008</td><td>6</td><td>0</td><td>40</td><td>40</td></tr> <tr><td>2009</td><td>6</td><td>0</td><td>42</td><td>42</td></tr> <tr><td>2010</td><td>5</td><td>0</td><td>42</td><td>41</td></tr> <tr><td>2011</td><td>5</td><td>0</td><td>41</td><td>41</td></tr> <tr><td>2012</td><td>5</td><td>0</td><td>42</td><td>41</td></tr> <tr><td>2013</td><td>5</td><td>0</td><td>41</td><td>41</td></tr> <tr><td>2014</td><td>5</td><td>0</td><td>42</td><td>41</td></tr> <tr><td>2015</td><td>5</td><td>1</td><td>41</td><td>41</td></tr> <tr><td>2016</td><td>6</td><td>2</td><td>40</td><td>40</td></tr> <tr><td>2017</td><td>6</td><td>2</td><td>39</td><td>39</td></tr> <tr><td>2018</td><td>6</td><td>3</td><td>38</td><td>38</td></tr> <tr><td>2019</td><td>6</td><td>4</td><td>38</td><td>38</td></tr> </tbody> </table>														Year	Add'l Cap to meet at least 13.2% RM (MW)	Indicative Supply (MW)	Firm Supply (MW)	PEAK LOAD (MW)	2005	5	0	40	40	2006	5	0	40	40	2007	5	0	39	40	2008	6	0	40	40	2009	6	0	42	42	2010	5	0	42	41	2011	5	0	41	41	2012	5	0	42	41	2013	5	0	41	41	2014	5	0	42	41	2015	5	1	41	41	2016	6	2	40	40	2017	6	2	39	39	2018	6	3	38	38	2019	6	4	38	38

Franchise Population											
SUPPLY HIGHLIGHTS											
<p>The Coop entered into a Bilateral Contract w/ GNPower w/c will be in effect by year 2012 w/ a contracted demand of 10MW. Also, the proposed Wind Farm in Pamplona, Cagayan is expected to be operational by 2011. This will stabilize power rates. Renewed the 3-yr Power Supply Agreement w/ SN Aboitiz Power (SNAP). The fast development of CEZA at Sta. Ana, Cagayan requires an additional 10MVA Substation and 69kV transmission line extension for a reliable and efficient power supply. The coop already acquired the 69kV Sub-trans line of NGCP (formerly TransCo).</p>

SUPPLY HIGHLIGHTS																																																																																											
BATANELCO Supply Contract with NPC SPUG expires in 2013. Renewable every ten years based on the contract. Based on the graph the power contract shows an excessive power supply that causes negative impact on the chart.

SUPPLY HIGHLIGHTS																																																																																															
<p>At present, NPC is the only power supplier of NEECO II Area 1. Prior to the expiration of Power Supply Contract with NPC on October 2008, the Cooperative invited other power suppliers thru competitive selection process. Unfortunately, no one has submitted</p>

Franchise Population	

SUPPLY HIGHLIGHTS

NEECO II-AREA 2 will install 10 MVA substation at Peñaranda, Nueva Ecija in CY 2011 and 5 MVA in Laur in CY 2013. The EC's power supply contract (PSC) with NPC-First Gen thru CSEE expired last June 2008. First Gen extends the effect of existing PSC while negotiations of the bilateral contract is still pending. After the CSEE, a Bilateral Contract (CY 2008 - 2018) with the First Gen is now in the process for approval.

Franchise Population	

SUPPLY HIGHLIGHTS

Supply service is provided by the National Power Corporation (NPC-SPUG). The franchise is fed through two (2) substation drawing power from the NPC 69 KV Mindoro Grid. The Mamburao 10 MVA Substation covers the OMECO North Distribution Grid serving the municipalities of Abra de Ilog, Mamburao and Sta. Cruz. A local NPC owned Diesel Power Plant feeds the area during 69 KV sub transmission line outages and helps to boost the power during peak periods of the 69 KV grid. OMECO's 5 MVA (Pag-aso) Substation normally serves the municipality of Sablayan and some barangays of Sta. Cruz and Calintaan. Occasionally, it also feeds the towns of Calintaan and Rizal whenever there is capacity shortage in the south. NPC's Diesel Power Plant, delivers 0.6 MW to the municipalities of Calintaan, Rizal, San Jose and Magsaysay, co-generating with NPC's Power Barge 106 that has a dependable capacity of 7.4 MW.

SUPPLY HIGHLIGHTS																																																																																															
<p>MARELCO draws power from NPC-SPUG which originally operates three (3) power plants located in separate generation sites. The main bulk of power is being supplied by NPC Power Barge 120 (PB 120) which is more adjacent to the Balanacan Port in Mogpog. Another set of generating unit is installed and operated by NPC inside MARELCO's own plant facility in Bantad, Boac. A third set of generating unit is located in Brgy. Cagpo, Torrijos. After dry docking PB-120 was back for operation. The total capacity of NPC is 9,172 MW with generating capacity of 7,550 MW.</p>

SUPPLY HIGHLIGHTS																
At present, the coop is experiencing power supply shortage from its existing generating company. The coop was expected to source power from 3i PowerGen (New Power Producer) starting May 2008, however, the said NPP failed to comply as to the agreed schedule. Meanwhile, NPC-SPUG delivers power with net dependable capacity lowered than the EC demand. Thus, load shedding occurs frequently from 3 to 4 hours in 4 municipalities.

SUPPLY HIGHLIGHTS																																																																																	
<p>CASURECO II is a direct participant at WESM. The EC also gets supply from Bicol Hydro Electric. Currently, supply is still sufficient to accommodate projected gradual increase in consumption for the next five years.</p>

SUPPLY HIGHLIGHTS

Regular inspection and calibration of kWh meters for commercial and industrial consumers will be conducted to further minimize pilferages and technical losses. Enough supply is expected as Transition Supply Contract with NPC will expire in CY 2012.

SUPPLY HIGHLIGHTS

MASELCO is an island coop under NPC-SPUG Island Grid and it is being supplied by NPC thru Aggreko, IPP rented genset. Total capacity is 15 MW and present demand is 10.070 MW. Hopefully, the new power provider, D.M. Consunji, Inc.(DMCI) which is initially diesel-operated will be functional this year which is also projected to augment the power need through coal-fired operation.

SUPPLY HIGHLIGHTS																																																																																											
<p>Upgrading of existing 5 MVA substation in Tigaon will be undertaken in 2010. Also, construction of 5 MVA substation at Maligaya, Caramoan is planned to be implemented in 2012. CASURECO IV will continue to acquire 97.8% of its power from APRI. The remaining 2.18% will be taken from the proposed Mini Hydro which will start on July 2010.</p>

SUPPLY HIGHLIGHTS	
<p>The acquisition of 69KV line will increase/decrease the cost of Transmission Charge after the said investment is fully paid. Also, the proposed Mini-Hydro Power Plant Development will benefit the EC to supply power from its neighboring coop. Thus, an opportunity for the coop to venture into core business of Power Producing and Wire. TSC will end on year 2010, as to date MOPRECO is open on Power Supply Contracting.</p>

SUPPLY HIGHLIGHTS

Our Power Supply Agreement with NPC ends last December 2009. CAPELCO power is being supplied by an embedded IPP delivering 8 MW, 12 MW from GREENCORE GEOTHERMAL, INC. and possible late this year, 8 MW from GBPC Coal Power Plant. In consideration are the possible participation in WESM and a Biomass Power Supplier.

SUPPLY HIGHLIGHTS																																																																																											
<p>The Transition Supply Contract with NPC expires on December 25, 2010. To address the requirements after 2010, the utility has already signed a 10-year Power Supply Contract with Kepco-Salcon Power Corporation which is still subject to approval of ERC. Negotiation is under way for a firm contract with another IPP.</p>

SUPPLY HIGHLIGHTS		PEAK LOAD (MW)											
CEBECO III has energized its 10MVA Balamban S/S last April 26,2008. The total substation capacity including CY2010 will be 30 MVA and the EC plans to construct 4 more substations in 10 years time. CEBECO III will renegotiate its contract with its IPP upon completion of the new power plant to augment the EC's projected demand.		3	3	4	4	4	4	4	5	5	5	5	5

Coverage Area	1,680.9 square kilometers.
No. of barangays	366
Franchise Population	
SUPPLY HIGHLIGHTS	
<p>CEBECO I sources its power requirement from NPC and from its Mini Hydro Power Plants. The cooperative has a Transition Supply Contract until December 2010. It has signed a bilateral contract with Kepco-Salcon Power Corporation (KSPC) by the Year 2011 for ten years equivalent to 7MW base load and the excess for NPC or its successors to supply. A scenario is taken into account that its large load customers will seek other power suppliers as Open Access is implemented.</p>

SUPPLY HIGHLIGHTS	
<p>The increased in load is due to the increasing energy consumption per classification on consumers. The requirements for substation capacity in order to address the increasing load was designed and evaluated to commission a 10-MVA substation in Panglao by 2010. Panglao Island is a famous tourist destination and there is a proposed international airport for construction. The firm supply from years 2011-2019 decreased as indicated in the graph because there is no more contract between BOHECO 1 & Sta. Clara IPP due to small power capacity.</p>

SUPPLY HIGHLIGHTS																																																																																										
<p>The main supplier of BANELCO is BIPCOR with its 2-3MW bunker C fired units. The Phase In Phase Out (PIPO) among BIPCOR, NPC-SPUG and BANELCO is still in effect. Under this PIPO, NPC-SPUG will augment the capacity of BIPCOR during peak time and whenever BIPCOR provide power. In 2009, BANELCO had an excess power supply because both NPC and BIPCOR were both supplying during this period. NPC served only as a backup of BIPCOR as agreed upon by both power plants even at remaining 10 years that served excess supply.</p>

SUPPLY HIGHLIGHTS																																																																																										
<p>The 10 MVA substation which was replaced by a 20 MVA substation was transferred to Sagcahan to eliminate the overloading of power transformer in that area resulting to reduction of system loss and improved service reliability. With new existing TSC and plan to embark on renewable energy source of power.</p>

SUPPLY HIGHLIGHTS											
<p>SAMELCO II upgraded the Cathbalogan substation from 5 MVA to 10 MVA in 2009. The replaced 5 MVA will be reconditioned in preparation for capacity increase by 2013. An additional substation will be commissioned in the town of Villareal that will supply three (3) Municipalities for the improvement of power quality and system loss reduction.</p>

SUPPLY HIGHLIGHTS																																																																																	
<p>SAMELCO I will complete the construction/upgrading of Capoocan Substation by the 2nd quarter of 2010 thus increasing the supply capacity from 15 to 25 MVA. This will be enough to meet the forecasted demand of the city of Calbayog and provide flexibility in the power delivery. A new one (1) year renewable power supply contract was submitted to NPC/PSALM. The coop will negotiate with prospective companies who can undertake the rehabilitation of Ton-ok Mini-hydro plant to restore its original generating capacity to 1.08 MW.</p>

SUPPLY HIGHLIGHTS		Supply - Demand Profile (MW)																																																																																												
The existing 3.75 MVA power transformer at Brgy. Gaas, Baybay will be replaced by 5 MVA in 2010 to augment the power requirement of Baybay area. Subsequently, the 3.75 MVA power transformer will be transferred to the Municipality of Bato by 2012. The EC will renegotiate for a new power supply contract this year to augment projected demand.		<table border="1"> <thead> <tr> <th>Year</th> <th>Add'l Cap to meet at least 13.2% RM (MW)</th> <th>Indicative Supply (MW)</th> <th>Firm Supply (MW)</th> <th>PEAK LOAD (MW)</th> </tr> </thead> <tbody> <tr><td>2005</td><td>1</td><td>0</td><td>7</td><td>7</td></tr> <tr><td>2006</td><td>1</td><td>0</td><td>8</td><td>8</td></tr> <tr><td>2007</td><td>1</td><td>0</td><td>8</td><td>8</td></tr> <tr><td>2008</td><td>1</td><td>0</td><td>8</td><td>8</td></tr> <tr><td>2009</td><td>1</td><td>0</td><td>9</td><td>9</td></tr> <tr><td>2010</td><td>1</td><td>0</td><td>9</td><td>9</td></tr> <tr><td>2011</td><td>1</td><td>9</td><td>9</td><td>10</td></tr> <tr><td>2012</td><td>1</td><td>10</td><td>10</td><td>10</td></tr> <tr><td>2013</td><td>1</td><td>10</td><td>10</td><td>10</td></tr> <tr><td>2014</td><td>1</td><td>10</td><td>10</td><td>10</td></tr> <tr><td>2015</td><td>1</td><td>10</td><td>10</td><td>10</td></tr> <tr><td>2016</td><td>1</td><td>10</td><td>10</td><td>10</td></tr> <tr><td>2017</td><td>1</td><td>11</td><td>11</td><td>11</td></tr> <tr><td>2018</td><td>1</td><td>11</td><td>11</td><td>11</td></tr> <tr><td>2019</td><td>2</td><td>12</td><td>12</td><td>12</td></tr> </tbody> </table>													Year	Add'l Cap to meet at least 13.2% RM (MW)	Indicative Supply (MW)	Firm Supply (MW)	PEAK LOAD (MW)	2005	1	0	7	7	2006	1	0	8	8	2007	1	0	8	8	2008	1	0	8	8	2009	1	0	9	9	2010	1	0	9	9	2011	1	9	9	10	2012	1	10	10	10	2013	1	10	10	10	2014	1	10	10	10	2015	1	10	10	10	2016	1	10	10	10	2017	1	11	11	11	2018	1	11	11	11	2019	2	12	12	12

SUPPLY HIGHLIGHTS

NPC remains to be the perennial source of power in the absence of an alternative supplier. The EC shall renew their TSC with NPC or its successor. Meanwhile, the mandated 10% supply will be sourced from WESM and due to lack of power source in Eastern Visayas the remaining 10% will be subject to an annual renewal until WESM shall be available.

Continuous search for embeded renewable energy will be pursued such as the Bito River and Marabong River system. The urgent need to provide power substation due to the 80% loaded of the 10MVA substation requires to instantly install additional 10 MVA substation in Tanauan.

SUPPLY HIGHLIGHTS	
<p>Transition Supply Contract (TSC) with NPC will expire on August 25, 2010. On the other hand, the NPC-SPUG generates power for the off-grid consumers in the four barangays of Sacol Island, namely: Busay, Pasilmanta, Landang Laum and Landang Gua. Also existing in the coop's service area, is the land based diesel-fed power plant of the Western Mindanao Power Corporation (WMPC), an independent power producer (IPP) situated in Brgy. Sangali. The coop also draws power from ZAMSCURECO II in a "Sale for Resale" Agreement to serve consumers of Brgys. Limaong and Tumitus.</p>

SUPPLY HIGHLIGHTS																																																																																											
<p>ZAMASURECO II's one of the major activities for CY 2010 is augmentation of 5 MVA power transformer to existing M4-Sta. Barbara Substation with current capacity of 1-5 MVA. The impact of this augmentation is for de-loading of existing power transformer; increasing voltage ends and improve system loss at the area covered by the substation.</p>

SUPPLY HIGHLIGHTS																																																																																																																							
<p>For 2010, the coop will construct a 10 MVA s/s at San Miguel, Monterey and 5 MVA (69/34 KV) in Lunocan. Also, the coop will construct 25 kms 69 KV transmission lines from Lunocan to San Miguel, Monterey and 8 kms 34 KV line from Lunocan to Damilag. There is a plan to acquire 94.050 kms 69 KV line from TRANSCO traversing Lunocan to Tagoloan. The EC's Transition Supply Contract will expire in 2011.</p>

SUPPLY HIGHLIGHTS																																																																																											
<p>The outright reconnection of PACEMCO (formerly direct-connected cement factory consumer) due to a favorable court decision will contribute a major increase in sales for 2010 having an average 2Million kilowatt-hour per month and demand of 6,000kw. Other mining industries like Somitomo, Taganito, PGMC and Oriental Senergy are also online.</p>

SUPPLY HIGHLIGHTS											
<p>SURSECO I has an existing contract with NPC which will expire on August 2012. The decline in the 2010 sale is due to the disconnection of PICOP pumping station. The coop power supply is fully dependent on the NGCP transmission and sub-transmission facilities. The average growth rate is 0.60% per year.</p>

SUPPLY HIGHLIGHTS

Load forecasts is based on the assumption that NPC-SPUG can upgrade its power plant capacity to cater to the increasing power demand of industries, as well as the residential and other existing consumers. At present, there is an on-going construction of 2 units 500 kw genset power plants of NPC SPUG while a 500 kw mini-hydro of Loreto LGU has been tested. Meanwhile, the power contracts with the suppliers are under study by the EC Management.
