Notes:
1. Grid-connected and embedded generation facilities included
2. Offgrid capacity will be separated starting 2021
3. Based on the List of Existing Power Plants as of December 2023
4. Installed Capacity - nameplate capacity; full-load continuous gross capacity of a unit under specified conditions, as calculated from the electric generator nameplate based on the rated power factor.
5. Dependable Capacity - maximum capacity when modified for ambient limitations for a specified period of time, such as a month or a season.
