

HYDROPOWER PRE-DETERMINED AREAS

AREA NO. 9 - SIBALOM (MIDDLE CASCADE)

PROFILE

Project Name : Sibalom (Middle Cascade)
Potential Capacity : 4MW
Type : Run of river
River Source : Sibalom
Location
Region : Western Visayas Region (VI)
Province : Antique
Municipality : San Remigio
Coordinates
Weir/Dam : 10° 58' 31.03" N, 122° 10' 32.32" E
Powerhouse : 10° 56' 59.03" N, 122° 09' 22.14" E
Catchment Area : 92km²
Effective Head : 60m
Discharge : 8.51m³/s

LOCATION MAP

HYDROPOWER PRE-DETERMINED AREAS

AREA NO. 9 - SIBALOM (MIDDLE CASCADE)

BACKGROUND

- The Hydropower Service Contract (HSC) which previously covered the development of the project was awarded on 23 October 2009 and was eventually terminated on 20 November 2014. The HSC was subsequently terminated with finality on 15 April 2019.
- The HSC was terminated due to the RE Developer's non-compliance with the approved work plan and non-posting of performance bond. The RE Developer was given time to cure its defaults but failed to do so. As such, the HSC was terminated with finality.
- The Feasibility Study and Detailed Engineering Design were undertaken by Vergel³ Consult on February 2010 and November 2012, respectively.
