### BACKGROUND

- The Hydropower Service Contract (HSC) which previously covered the development of the project was awarded on 19 March 2014 and was eventually terminated on 23 December 2019.
- The HSC was terminated due to the RE Developer's failure to comply with the approved work program and obligations under the HSC. While the RE Developer was able to declare the commerciality of the project, it failed to submit permits and endorsements from other government agencies.
- The Feasibility Study and Detailed Engineering Design were undertaken by Fil-Asia Energy and Technical Services, Inc. in 2015.
