

HYDROPOWER PRE-DETERMINED AREAS

AREA NO. 17 - BALINTINGON

PROFILE

Project Name : Balintingon
Potential Capacity : 52MW
Type : Reservoir
River Source : Sumacbao
Location
Region : Central Luzon (III)
Province : Nueva Ecija
Municipality : General Tinio
Coordinates
Weir/Dam : 15° 18' 58" N, 121° 06' 53" E
Powerhouse : 15° 17' 16" N, 121° 10' 24" E
Catchment Area : 224.8km²
Effective Head : 114m
Discharge : 50m³/s
Remarks : Multipurpose Project (the project can provide for irrigation)

LOCATION MAP

HYDROPOWER PRE-DETERMINED AREAS

➤ AREA NO. 17 - BALINTINGON

BACKGROUND

- The Hydropower Service Contract (HSC) which previously covered the development of the project was awarded on 29 March 2012 and was eventually surrendered by the RE Developer through a letter 27 March 2017.
- The DOE informed the RE Developer through a letter dated 12 July 2017 that it poses no objection to the request to surrender the HSC. Per letter from the RE Developer, the project was found to be not financially viable.
- The Feasibility Study was undertaken by Poyry Energy Ltd. on April 2015.
